

LIGHTING SOLUTIONS FOR YOUR SCHOOL

Seesmart, Inc. is a California-based technology company that designs and manufactures high-quality, energy-saving LED lamps and fixtures. Seesmart's customers are institutions, businesses, and individuals seeking high-quality lighting products that will reduce their maintenance requirements, reduce their energy cost and consumption, and reduce their overall environmental impact. Seesmart has worked with many educational facilities across the country to develop lighting solutions that work for the students, the staff, the faculty, the budget, the environment, and the greater community.

Seesmart's educational customers include private grade schools, public school districts, and college campuses. Seesmart's vast range of LED lighting products works seamlessly with many other energy-saving technologies, including control systems, occupancy sensors, and solar energy systems. Seesmart customers often find that upgrading to LEDs not only improves the environmental profile of an institution, it also improves the aesthetics of a structure and the productivity of its occupants.

Perhaps one of Seesmart's best-known clients is Pasadena City College (PCC), a community college in Pasadena, Calif. PCC is a forward-thinking institution that is nationally renowned for its initiatives in sustainability. In 2011, Seesmart secured a \$2.3 million contract with Pasadena City College (PCC) for a campus-wide lighting retrofit spanning 34,000 lights and 26 buildings. Each fluorescent tube light in these buildings, including the gymnasium, parking structures, mechanical rooms, offices, stairwells, and classrooms, was replaced with a Seesmart LED tube light.

The anticipated financial and environmental benefits of the PCC lighting retrofit are tremendous. The college is looking forward to saving \$720,000 and 3.7 million kilowatt-hours annually because of its switch to LED. The college's carbon footprint will be reduced by 5 million pounds per year. Additionally, the college is expecting an \$850,000 rebate from the local utility company for this energy-saving project.

If your campus is ready to save money and improve its environmental profile, chances are that Seesmart has a lighting solution to fit your style, infrastructure, and budget. We offer over 500 products for interior and exterior general illumination. Contact us today to explore the ways that Seesmart can transform your campus.
